TITANIUM TUNGSTEN

## Tomorrow's technology - Today's Dart!

A breakthrough in Tungsten technology

Created by Unicorn design specialists using state-of-the-art scientific approach

Ionised titanium fed into a plasma of ionised argon and nitrogen creates titanium nitride which 'grows' on the 90% tungsten alloy substrate

This costly technique coats the tungsten alloy surface with an ultra hard, wear and corrosion resistant compound at the same time beneficially improving texture and 'feel'

## See the difference...

Gold distinction - a new look for darts  
MX black SlikStik® patent shaft discreetly gold banded

Golden 'Q'™ Super-wave metallic flights  
Laser engraved Unicorn hallmark of quality  
Deluxe Designer Case

## Feel the difference...

New texture, optimum 'feel', grip without slip but the smoothest release yet  
Surface does not absorb natural oil in fingers - 'feel' retained throughout its long life
